

Architects, Builders, Code Officials, Homeowners, Insurance Agents, and Surveyors are all turning to SMART VENT Foundation Flood Vents to protect homes from the devastation and destruction that a hurricane, flood or other natural disaster can cause.

"My four year warranty on all our projects necessitates installing products that perform. When Hurricane Irene made a direct hit on Fairfield County in August of 2011, I had close to 40 Smart Vent Flood Vents on two waterfront projects and every one performed flawlessly."
